Rationale

Material event

The Reserve Bank of India (RBI), vide its press release dated [October 17, 2024](#), directed Arohan Financial Services Limited (Arohan) to stop sanctioning or disbursing loans effective October 21, 2024. The company can, however, continue to service its existing borrowers through the usual collection and recovery process. This move came after the RBI's material supervisory concerns on the company, wherein certain observations were made regarding usurious pricing, evergreening of loans and other compliance matters. As per ICRA's discussions with the management, Arohan is in the process of taking corrective actions to comply with these observations.

Impact of material event

Considering the restriction on fresh loan disbursements and the short tenor of these loans, the overall assets under management (AUM) shall decline. Though the company has been allowed to continue with the collection and recovery process, its ability to maintain the asset quality shall be monitorable if the restriction on disbursements continues for a prolonged period. Arohan's profitability and financial flexibility are likely to be negatively impacted, depending on the duration of the business restrictions.

As on September 30, 2024, Arohan had an unencumbered cash and liquid balance of around Rs. 1,120 crore with scheduled principal collections of Rs. 4,615 crore in the next one year ending September 30, 2025, against the scheduled debt repayment of Rs. 3,637 crore during this period. The asset-liability management (ALM) statement, as of September 30, 2024, had positive cumulative mismatches across all buckets. Given the uncertainty regarding the period of restriction and the likely impact of the same, ICRA has placed the rating on Watch with Negative Implications. ICRA will continue to monitor developments closely and will take appropriate rating action based on the resolution of the regulatory directives and its impact on the company's credit risk profile.

Any other information:

ICRA notes that Arohan also faces prepayment risk, given the possibility of debt acceleration upon the breach of covenants, including financial, operating and rating-linked covenants. Upon failure to meet the covenants, if the company is unable to get waivers from the lenders/investors or they do not provide it with adequate time to arrange for alternative funding to pay off the accelerated loans, the rating would face pressure. The management has guided that Arohan has requested for waivers from lenders/investors for such breaches and no negative comments/adverse actions have been taken for the same. ICRA notes that Arohan has been able to raise fresh funds despite covenant breaches in the last 2-3 years.

Complexity level of the rated instruments

Instrument	Complexity Indicator
Subordinated debt	Simple
NCD	Simple
Long-term bank facilities – Fund based	Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects.
